

# **Change is Hard Personal and Emotional**

**Using Implementation Science Makes it Easier!**

**@characterstrong**

# What's Your Summer Self-Care Style?

Which best describes how you recharge over the summer?"

## What's Your Summer Self-Care Style?

1. **Restorative:** Naps, slow mornings, nature walks
2. **Adventurous:** Travel, hiking, trying new experiences
3. **Creative:** Writing, art, gardening, building
4. **Social:** BBQs, family adventures, hosting gatherings

1

Think of a time when your organization adopted something new, and **it did not gain results?**

- a. What was it?
- b. What was the cost?
- c. Human?
- d. Capital?

What does it really cost when we don't pay attention to **Implementation?**

**600 educators**  
trained, we can  
expect to see this  
program/practice  
in **30 classrooms**  
**(5%).**

Joyce and Showers

Without focusing on skill-building to improve fidelity to EBPs/Ells, **an average district may spend \$300,000 on training for 600 staff** and only achieve a Return on Investment of 30 teachers actually using the EBP/Ell in their classrooms as intended.

Therefore, most students will not benefit.

Gerald R Williams 2015

# Goals for our Time Together

**Objective #1** Understand the the difference between wicked problems and critical problems

*Build capacity and shift culture through learning.*

**Belief: Great implementation depends on great implementers.**

# Goals for our Time Together

**Objective #2:** Build *implementation literacy*.

*Understand the discipline. Apply the research. Drive results.*

**Belief: Implementation is a science.**

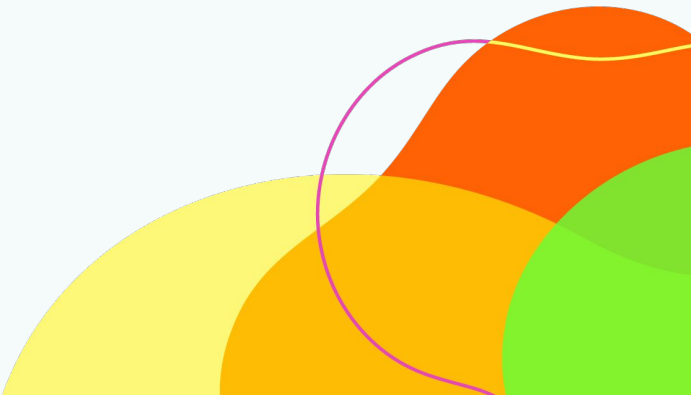

# Goals for our Time Together

A yellow squiggle is located below the title.

**Objective #3:** Develop Understanding of Human-and Learning-Centered Implementation

*Expect resistance. Normalize emotion. Lead with intention.*

**Belief: Change is hard, personal, and emotional.**

In the bottom right corner, there are several overlapping circles in shades of orange, yellow, and green, some with thin purple outlines.

# WE ARE ON TRACK FOR TROUBLE.

**“IMPLEMENTATION SCIENCE RESEARCH HAS ESTIMATED  
THAT TWO-THIRDS OF IMPLEMENTATION EFFORTS FAIL.”**

Cook et.al., 2019

## Critical Problems

- Are urgent and significant issues with a defined problem statement and potential solutions
- Allow for clear framing, as they are well-defined and specific
- Often ‘thing’ based with achievable and static solutions
- Solutions that can be objectively evaluated

# WE ARE ON TRACK FOR TROUBLE.

**“IMPLEMENTATION SCIENCE RESEARCH HAS ESTIMATED  
THAT TWO-THIRDS OF IMPLEMENTATION EFFORTS FAIL.”**

Cook et.al., 2019

## Wicked Problems

*Interaction-based innovations present ‘wicked problems’ (Rittel and Webber, 1973).*

- Complex, multi-faceted, and challenging
- Ill-defined and often evolve over time
- Fight back when solutions are attempted
- Context-dependent solutions
- Require precise and persistent implementation capacity

## Quick Write

**Write a definition of  
Implementation  
science**

# What are these things?

What does this have to do with our work?

# What does this have to do with our work?

Adopt

Use/Try

Tight/Loose

# How do we close the implementation gap?

The gap between what we know and what we do to implement MTSS.

# Effective Implementation is **complex**

Synonymous with  
**Change**

Requires careful  
**Planning**

Uses frameworks  
Implementation **Teams**  
and **Implementation**  
**Tools**

Takes place in  
**Stages**

Implementation science is how “we get ‘what works’ to the people who need it, with greater speed, fidelity, efficiency, quality, and relevant coverage” (University of Washington, n.d.).

Implementation science is the “application and integration of research evidence into practice and policy” (Glasgow, Eckstein, & ElZarrad, 2013, p. 26).

The study of how to implement evidence-based practices right and well so that they have an impact. (Pizzuto, Carney 2024 p. 23).

## Implementation = Change = Learning

Implementation is a **process** not an event.

# Turn & Talk

- ☐ Thoughts?
- ☐ Aha's?

## Refine Your Definition

**Round robin share with  
your table.**

What if your organization used  
**impactful, easy to understand  
and translate** implementation  
tools to support your ongoing and  
new change efforts?

Students cannot benefit from  
**ineffective things**  
implemented well

OR

**effective things** that they do  
not receive

**“Just Do It” doesn’t work**

**Only 1 in 7**  
**make the change**

**~~Just Do It.~~**

**Change is hard,  
personal, and  
emotional!**

# Connection *Matters.*

Sometimes We're Not  
Getting the **ABCs** Right

A solid yellow square is positioned to the left of the word 'Adult'.

**A** Adult

A solid yellow square is positioned to the left of the word 'Behavior'.

**B** Behavior

A solid yellow square is positioned to the left of the word 'Change'.

**C** Change

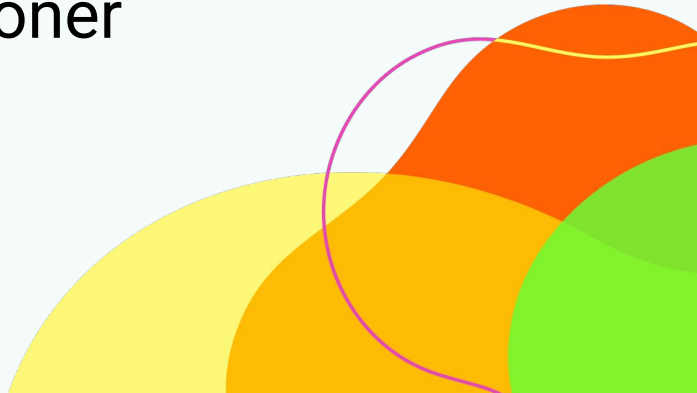

A decorative graphic in the bottom right corner consists of several overlapping circles in shades of orange, yellow, and green, with thin purple and yellow lines curving around them.

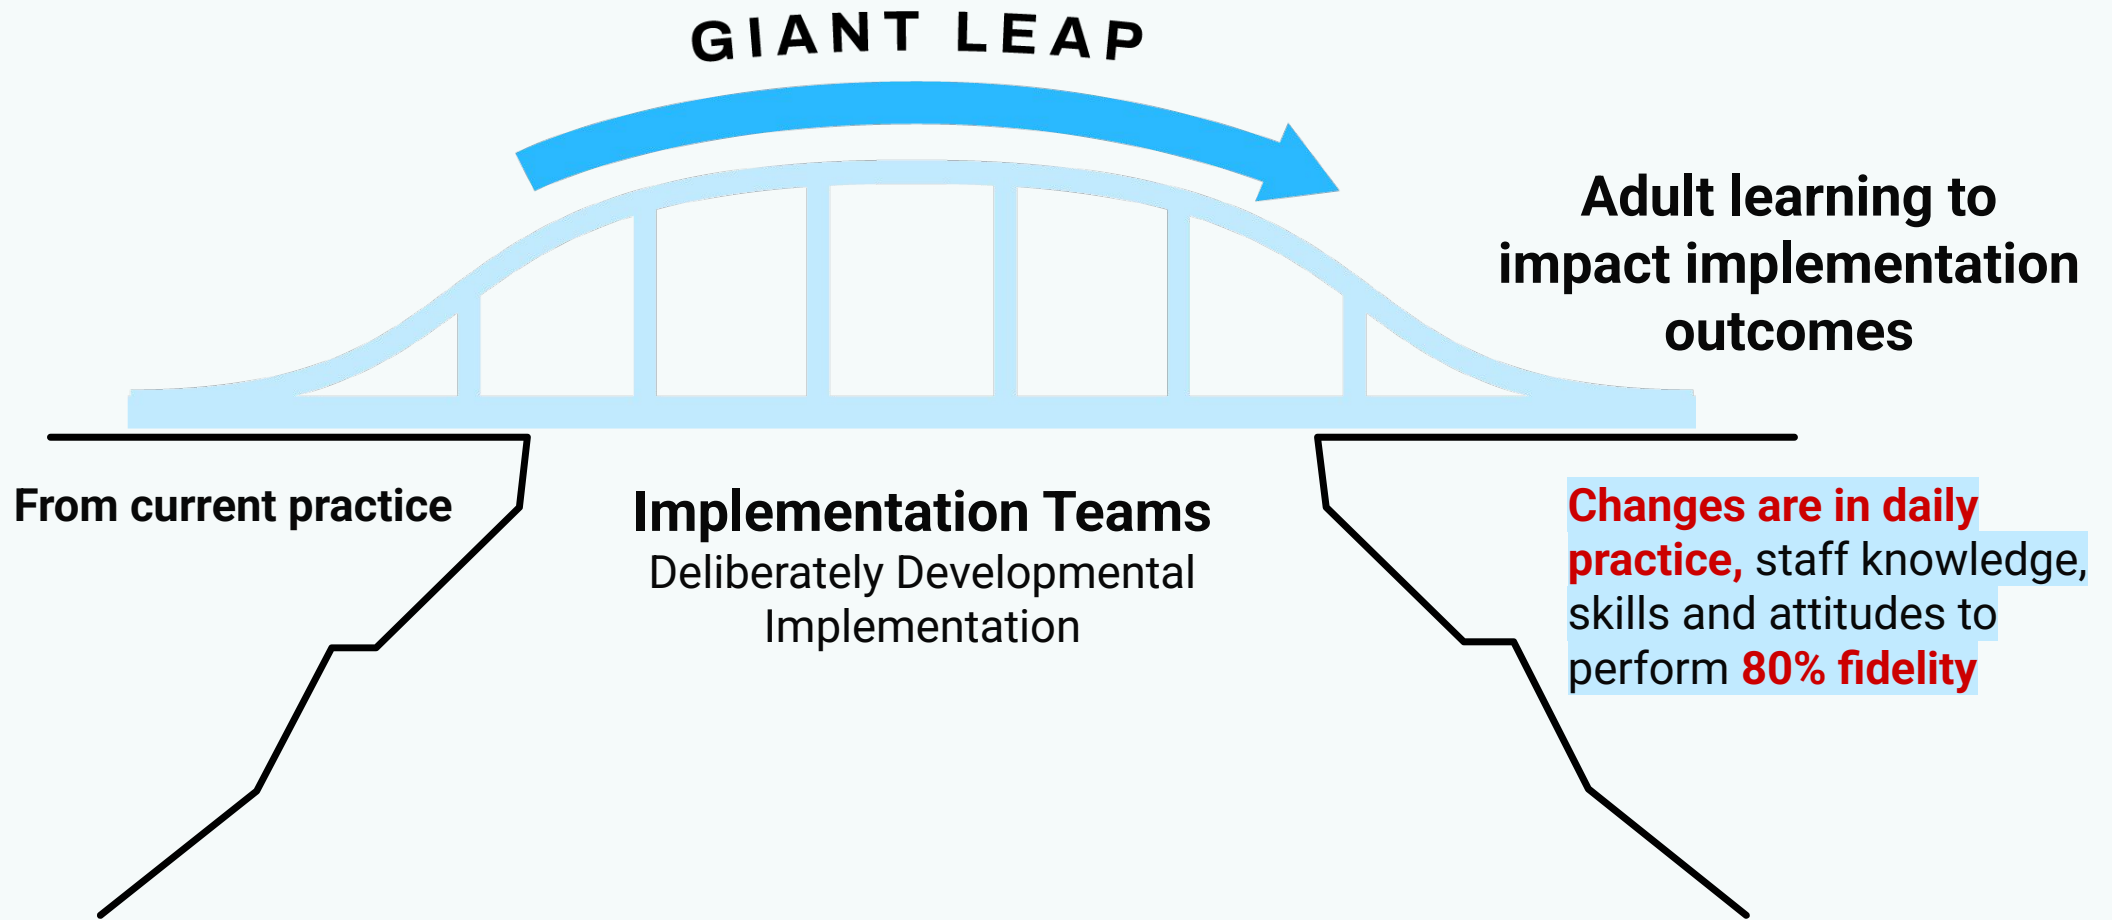

## Moving from:

‘Adopting’ a new program, practice, strategy, or policy

## To:

Making the giant leap, include **DDI, all along the implementation journey**. Support people to and through the implementation to build practitioner **Knowledge, Skills, and Attitudes (K.S.A.’s)**.

# GROW

K

S

A

**Goal =** Utilizing a **learning and improvement culture.**

**Reciprocal** vs. Transactional.

**Abundance** vs. Scarcity.

# Going from this... to this.

Everyone in the same boat and rowing in the same direction with paddles to achieve prioritized student outcomes of interest

**This is how we solve the implementation gap.**

Effective implementation  
requires focusing on growing the  
implementers....with a **Human and  
Learning-Centered** mindset.

## I.M.P.A.C.T:

Implementation Framework  
Human and Learning-Centered  
Design Elements©

Pizzuto & Carney,  
2021©

# Human-Centered:

An essential addition to traditional implementation science, ***prioritizes trust, psychological safety, and belonging***, ensuring implementers feel **seen, heard, and valued** throughout the change process.

# Learning-Centered:

Grounded in ***adult learning and improvement science***, this approach ensures **learning is relevant**, job-embedded, and adaptive—building the **mindsets, skills, and capacity** needed for sustained and effective implementation.

# Key Components of **Human** **and Learning-Centered**

- **Relationships before strategies** – Implementation must be built on trust, belonging, and human connection.
- **Implementation as learning** – It's not a one-time training; it's an ongoing process of learning, applying, reflecting, and adapting.
- **Emotionally intelligent systems** – Acknowledging that emotions and psychological safety impact how people engage with change.
- **Co-design with implementers** – Engaging those closest to the work in shaping how change is introduced and supported.

# Knoster Complex Change Model

Adapted from Knoster, T., Villa, R., & Thousand, J. (2000). A framework for thinking about systems change. In R. Villa & J. Thousands. (Eds.). Restructuring for caring and effective education: Piecing the puzzle together. (pp. 93-128). Baltimore: Paul H. Brookes Publishing Co.

In the education or human service system, where resources and time are limited, strategic implementation can often be the **difference between programs that fail and programs that create sustainable change.**”

*- Aaron R. Lyon PhD, SMHSA  
Implementation Science and Practice In  
the Education Sector, 2019*

"It doesn't matter how great an educational idea or intervention is in principle; what really matters is how it **manifests itself in the day to day work of people in schools.**"

*- Education Endowment Foundation, 2018*

# Building Implementation Teams - Bottom-up Leadership

## Benefits:

- ☐ Distributed Leadership
- ☐ Built-in credibility creating greater staff buy-in
- ☐ Tapping knowledge and expertise of teaching staff

# Implementation Team Hierarchy

**An Audit of Our Commitment to Key PLC Concepts**

**Part III.A Focus on Results**  
We assess our effectiveness on the basis of results rather than intentions. Individuals, teams, and schools seek relevant data and information and use that information to promote continuous improvement.

Indicator	Pre-Initiating	Initiating	Implementing	Developing	Sustaining
Each of our teams has identified a SMART goal that aligns with one of our school goals.	We have not yet begun to address this issue.	We are talking about this, but we have taken no significant action to make it a reality.	We have begun to do this, but the stage of implementation and process is not clear. Support is growing, but changes remain fragile.	We have moved beyond initial implementation and continue to work our way through the process. Support is growing, but changes remain fragile.	This practice is deeply embedded in our culture. Most staff are committed to doing this and feel it is an important factor in the collective effort to improve the school.
Each member of the team receives frequent and timely feedback regarding the performance of his/her students on team, district and state assessments.	We have not yet begun to address this issue.	We are talking about this, but we have taken no significant action to make it a reality.	We have begun to do this, but the stage of implementation and process is not clear. Support is growing, but changes remain fragile.	We have moved beyond initial implementation and continue to work our way through the process. Support is growing, but changes remain fragile.	This practice is deeply embedded in our culture. Most staff are committed to doing this and feel it is an important factor in the collective effort to improve the school.
We use common assessments to: a) identify students who need additional time and support for learning; b) discover strengths and weaknesses in our individual teaching; and c) help measure our team's progress toward its goals.	We have not yet begun to address this issue.	We are talking about this, but we have taken no significant action to make it a reality.	We have begun to do this, but the stage of implementation and process is not clear. Support is growing, but changes remain fragile.	We have moved beyond initial implementation and continue to work our way through the process. Support is growing, but changes remain fragile.	This practice is deeply embedded in our culture. Most staff are committed to doing this and feel it is an important factor in the collective effort to improve the school.
For each of the academic and affective goals we have identified for students, we ask, "How do we know if our students are achieving this goal?"	We have not yet begun to address this issue.	We are talking about this, but we have taken no significant action to make it a reality.	We have begun to do this, but the stage of implementation and process is not clear. Support is growing, but changes remain fragile.	We have moved beyond initial implementation and continue to work our way through the process. Support is growing, but changes remain fragile.	This practice is deeply embedded in our culture. Most staff are committed to doing this and feel it is an important factor in the collective effort to improve the school.

I believe that there is strong leadership guiding our RTI system.

Core Principles of an MTSS Framework with a Continuous Improvement Framework  
MTSS is Continuous Improvement Framework. A process that is utilized systematically, uses data, collaboration, evidence-informed practices and assessments.

Component	Not Started	Started	In Place 80% of staff with fidelity	Evidence in Place
<b>Culture of MTSS</b>				
• Belief ALL students CAN learn				
• Resources are allocated				
• A Problem Solving Culture				
<b>Data-Driven Decision Making</b>				
• Ongoing Problem-solving for district sites, classrooms and individual students				
• Data drives decision making				
• Progress Monitoring occurs across the system				
<b>Multi-Tiered Interventions</b>				
• High quality core, first instruction				
• Use of a Universal Screener				
<b>Evidence-Based Practices</b>				
• Well researched programs, including core curriculum that ALL students receive in all subjects and grade levels and best practices are implemented at all levels of the system				
<b>Inclusive Practices</b>				
• Staff share the responsibility to educate ALL students				
• Student interventions and supports are layered to allow best inclusive opportunities possible				
<b>Collaboration</b>				
• Professional Learning Communities				
• Collaborative Teams to analyze data				
• Common Formative Assessments				

Adapted from: San Bernardino Unified School District 2021, Handbook

I believe that there is strong leadership guiding our MTSS system.

## K-5 Regular Attenders Details

### Regular Attenders Details

District: Klamath Falls City Schools

Level: Elementary (Grades K-5)

The Regular Attenders indicator displays the percentage of students attending for more than 90 percent of their enrolled school days, the denominator, and the corresponding rating for each student group. The data table shows three years of data and the three-year average. Student groups are assigned a rating based on the three-year average. '\*' means data was hidden to protect student confidentiality and 'Not Rated' refers to student groups that do not meet the minimum n-size of 20 to receive a rating. Note that the Students Experiencing Poverty student group replaced the formerly used Economically Disadvantaged student group.

Regular Attenders Level	Cut
Level 5	93
Level 4	89
Level 3	85
Level 2	52
Level 1	<52

State Long Term Goal: 93%

Student Group	Grade Range	2021-22	2022-23	2023-24	3-year Average	Level
All Students - Percent	K-5	52.6	61.7	62.2	58.9	Level 2
All Students - Denominator		1119	1097	1176	3392	
Students Experiencing Poverty - Percent	K-5	40.8	51.8	51.7	48.1	Level 1
Students Experiencing Poverty - Denominator		652	620	690	1962	
English Learners - Percent	K-5	52.6	58.2	60.3	56.7	Level 2
English Learners - Denominator		78	67	63	208	
Students with Disabilities - Percent	K-5	45.1	48.5	52.7	48.8	Level 1

Increases year over year in multiple groups
